

AMENDMENTS TO THE CLAIMS

Please amend claims 2, 5, 9-18, and 20-35, add claims 36-39, and cancel claims 1 and 19. All pending claims are reproduced below.

1. (Canceled).
2. (Currently Amended) ~~The method of claim 1,~~ A method comprising:
receiving a term in an input field;
~~wherein searching the article index comprises~~ generating a user context-dependent
search query based at least in part on a user context and the term, the search
query for searching an article index for a first article identifier identifying a
first article associated with the term;
receiving the first article identifier;
displaying in a transient menu associated with the input field the first article identifier
and an additional article identifier included within the first article, the
additional article identifier associated with an additional article.
3. (Original) The method of claim 2, wherein the user context is based, at least in part, on a user action history comprising a plurality of user actions.

4. (Original) The method of claim 3, wherein each of said user actions comprises a date/time parameter.
5. (Currently Amended) The method of claim [[1]] 2, wherein ~~causing displaying the first article identifier to be output in a transient menu associated with the input field~~ comprises ~~outputting~~ displaying the first article identifier in accordance with a user preference.
6. (Original) The method of claim 5, further comprising receiving the user preference.
7. (Original) The method of claim 5, further comprising determining the user preference based, at least in part, on a user action history comprising a plurality of user actions.
8. (Original) The method of claim 5, further comprising determining the user preference based, at least in part, on a system analysis.
9. (Currently Amended) The method of claim [[1]] 2, wherein the transient menu comprises a drop-down menu near the input field.
10. (Currently Amended) The method of claim [[1]] 2, wherein the transient menu comprises a pop-up menu near the input field.

11. (Currently Amended) The method of claim [[1]] 2, wherein the transient menu comprises a slide-out menu near the input field.
12. (Currently Amended) The method of claim [[1]] 2, wherein the input field comprises an address bar.
13. (Currently Amended) The method of claim [[1]] 2, wherein the input field comprises a query-input field.
14. (Currently Amended) The method of claim [[1]] 2, wherein the input field comprises an article-integrated input field.
15. (Currently Amended) The method of claim [[1]] 2, wherein the first article comprises a web page.
16. (Currently Amended) The method of claim [[1]] 2, wherein the first article comprises an article stored on a client device.
17. (Currently Amended) The method of claim [[1]] 2, further comprising:
searching a second article index for a second article identifier identifying associated
~~with the term, the second article identifier associated with~~ a second article
associated with the term; and

- ~~causing displaying the second article identifier to be output in the transient menu.~~
18. (Currently Amended) A method comprising:
- receiving a term in a network browser address bar;
- ~~generating searching an index with a user context-dependent search query based at~~
- ~~least in part on a user context and the term, the search query for searching an~~
- ~~article index for a first URL associated with the term, the URL associated with~~
- ~~identifying a first web page associated with the term;~~
- receiving the first URL; and
- ~~causing displaying the URL to be displayed in a transient menu near the network~~
- ~~browser address bar the first URL and an additional URL included within the~~
- ~~first web page, the additional URL associated with an additional web~~
- ~~page[[]].~~
- ~~receiving a select indication for the URL; and~~
- ~~displaying a web page associated with the URL.~~
19. (Canceled).
20. (Currently Amended) ~~The computer-readable medium of claim 19~~ A computer-
readable storage medium on which is encoded program code, the program code comprising:
- program code for receiving a term in an input field;
- program code for ~~wherein the program code for searching the article index comprises~~
- generating a user context-dependent search query based at least in part on a

user context and the term, the search query for searching an article index for a
first article identifier identifying a first article associated with the term;
program code for receiving the first article identifier; and
program code for displaying in a transient menu associated with the input field the
first article identifier and an additional article identifier included within the
first article, the additional article identifier associated with an additional
article.

21. (Currently Amended) The computer-readable storage medium of claim 20, wherein the user context is based at least in part on a user action history comprising a plurality of user actions.

22. (Currently Amended) The computer-readable storage medium of claim 21, wherein each of said user actions comprises a date/time parameter.

23. (Currently Amended) The computer-readable storage medium of claim ~~19~~ 20, wherein the program code for ~~causing displaying the first article identifier to be output~~ in a transient menu associated with the input field comprises ~~outputting~~ displaying the first article identifier in accordance with a user preference.

24. (Currently Amended) The computer-readable storage medium of claim 23, further comprising program code for receiving the user preference.

25. (Currently Amended) The computer-readable storage medium of claim 23, further comprising program code for determining the user preference based, at least in part, on a user action history comprising a plurality of user actions.

26. (Currently Amended) The computer-readable storage medium of claim 23, further comprising program code for determining the user preference based, at least in part, on a system analysis.

27. (Currently Amended) The computer-readable storage medium of claim ~~19~~ 20, wherein the transient menu comprises a drop-down menu near the input field.

28. (Currently Amended) The computer-readable storage medium of claim ~~19~~ 20, wherein the transient menu comprises a pop-up menu near the input field.

29. (Currently Amended) The computer-readable storage medium of claim ~~19~~ 20, wherein the transient menu comprises a slide-out menu near the input field.

30. (Currently Amended) The computer-readable storage medium of claim ~~19~~ 20, wherein the input field comprises an address bar.

31. (Currently Amended) The computer-readable storage medium of claim ~~19~~ 20, wherein the input field comprises a query-input field.

32. (Currently Amended) The computer-readable storage medium of claim ~~19~~ 20, wherein the input field comprises an article-integrated input field.
33. (Currently Amended) The computer-readable storage medium of claim ~~19~~ 20, wherein the first article comprises a web page.
34. (Currently Amended) The computer-readable storage medium of claim ~~19~~ 20, wherein the first article comprises an article stored on a client device.
35. (Currently Amended) The computer-readable storage medium of claim ~~19~~ 20, further comprising:
program code for searching a second article index for a second article identifier
~~identifying associated with the term, the second article identifier associated~~
~~with~~ a second article associated with the term; and
program code for ~~causing~~ displaying the second article identifier ~~to be output~~ in the
transient menu.
36. (New) The method of claim 2, wherein the additional article comprises a web page.
37. (New) The method of claim 2, wherein the additional article comprises an article stored on a client device.
38. (New) The method of claim 18, further comprising:

receiving a select indication for the first URL; and
displaying the first web page associated with the first URL.

39. (New) The method of claim 18, further comprising:
receiving a select indication for the additional URL; and
displaying the additional web page associated with the additional URL.
